

KITCHEN JOINERY CONSTRUCTION FOR BEST PRACTICE DESIGN

Refuel

1.0
FORMAL
CPD POINT

AACA Competency: Design

Module Outline: This module explains the various areas of kitchen construction, highlighting the drawer fittings and carcass and will provide guidance on the construction materials and planning of a domestic kitchen.

Learning Objectives:

1. Kitchen design and layout considerations
2. Technical concerns to be considered when assessing cabinet hardware
3. Construction materials for board selection
4. Decorative finishes for bench tops

Outcome: Reviewing material selection criteria and making the best possible decision for your client.

Who may benefit: The module maybe of interest to all architects and interior designers looking to improve their understanding and documentation of kitchen hardware and board materials.

Module creator: Lee-Anne Marotta

Duration: 1 hour
