

Waterproofing Design and Solutions Do's and Dont's

MODULE OUTLINE

Waterproofing Failure in buildings has become a significant problem for the industry as the cost of investigation and rectification is exceedingly large.

The Australian Institute of Waterproofing is committed to promoting

- Best Practices in Waterproofing.
- Industry awareness.
- Professionalism alongside trade qualifications and experience.

LEARNING OBJECTIVES:

1. Identify some of the major failures of waterproofing membranes 2 2.3
2. Evaluate why current waterproofed areas leak and identify the defects hidden in waterproofing membrane and how to eliminate them 8 8.3
3. Identify the importance of using compatible full waterproofing system in building particular end use areas
4. Describe how to identify what products can be used in particular end use areas 3 3.37

OUTCOME

This Module will provide you with a deeper understanding of the procedures and Systems required For Best practices in waterproofing.

You will know the difference between the waterproofing systems and why these are recommended in various building structures.

You will be able to Make informed decisions whilst specifying the waterproofing products and systems.

PRESENTER BIOGRAPHY

- Commenced in Waterproofing Industry June 2004.
- Extensive knowledge of Waterproofing Products and Systems.
- Ongoing training in Application methodologies and Rectification Processes.
- Sound knowledge of Australian Standards.
- Good understanding of various waterproofing systems in the marketplace.
- Presenting to specifiers and architects since 2010.

DURATION : 1 Hour
